Subject: RE: CCPR Priorities - Lindane monitoring data - last call for data [SEC=UNCLASSIFIED]

Date: Monday, December 22, 2014 1:51:03 PM

Hi David,

Some commodities were two-year commodities. We never use the same data in reports for two consecutive years. For example, this year we tested fresh peaches. Last year we tested baby food peaches. Lindane was not detected in any of the samples tested for both years. Kindly let me know if you would like for me to send a nicer table. The table looked fine when I typed it in the e-mail and not so good when I got the copy. Let me know and whatever you need me to do, I will be happy to do to help.

The result is that no lindane was detected.

Thanks,
Jan

Janet,

Thanks for being so fast!

Before I sent the email, I looked at the PDP CY 2012 summary and there were also no detects there either (some commodities were repeated from below).

David

Subject: Fwd: CCPR Priorities - Lindane monitoring data - last call for data [SEC=UNCLASSIFIED]

Good afternoon,

Diana asked me to respond to your message in her absence. In the 2013 PDP Annual Summary, which was released last week, the data show the following results:

Lindane - BHC gamma (insecticide)

| Commodity | | Sample Number % Samples with Dete | | with Detections | | | |
|------------------------|--------|-----------------------------------|----------|-----------------|-----|----------------------|----|
| Range of Values De | tected | | Range of | LODs | | EPA Tolerance | |
| Apple Juice | | 379 | | | 0 | | |
